5 April 2013

Dear Physics Student,

The National Institute for Theoretical Physics (NITheP) hosts an internship program. Under this program you can apply for financial support to spend university recess periods at the NITheP nodes at Stellenbosch University, the University of Witwatersrand and the University of KwaZulu-Natal or with one of the NITheP associates of whom a comprehensive list can be found on our webpage at http://nithep.ac.za/associates.html.

Concerning the upcoming recess period of June/July 2013, NITheP Associates and Staff have submitted 20 proposals from which prospective Internship students are able to choose and indicate their preference. Please view our website for a list of these topics http://nithep.ac.za/39w.htm. The process of Internship allocation will be managed in such a way that all interested and qualified candidates are accommodated in alternative projects if they are not selected for the topic of their choice.

During this period (maximum three weeks during June/July 2013) you will complete a project under supervision of a NITheP staff member or an associate. This project may, if approved by your host department, be used for credits. (Please enquire about this in advance from your home institution).

This is a call for applications for the June/July 2013 recess period. The next opportunities will be during November/December 2013. To apply, please complete the online application on the following link: http://nithep.ac.za/2f3.htm. Deadline for online applications is Tuesday the 30th of April 2013.

Applications must be accompanied by a complete study record, without which the application will not be considered. The following grants will apply: travel, accommodation and daily allowance.

For more information about NITheP, please visit our website on www.nithep.ac.za

Please direct all further enquiries to René Kotzé on 021-808-2653.

Kind regards

Prof F G Scholtz
